Brochier post-SR count variability and unit-pair correlations
doi:10.12751/g-node.f83565; dependent pairs; rank-limited covariance; no connectivity claim
Animal L: trial-count variability; mean count ≥ 1
Condition × unit cells
400-ms post-SR Fano factor (count variance / mean)
Animal L: signal-like vs residual correlation
condition × time means
trial residuals
Pair density
Pairwise Pearson correlation (descriptive)
Animal N: trial-count variability; mean count ≥ 1
Condition × unit cells
400-ms post-SR Fano factor (count variance / mean)
Animal N: signal-like vs residual correlation
condition × time means
trial residuals
Pair density
Pairwise Pearson correlation (descriptive)
